#### Filing Agent

Is this report being filed by an agent on behalf of a manufacturer or service provider? No

#### Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency

band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007 include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operations?  
Yes

Explain:

Do all hearing aid-compatible handsets that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

N/A

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

N/A

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

### Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: <http://www.mycricket.com/hac>

Explain:

### Consumer Outreach

Describe consumer outreach efforts in the past 12 months: In addition to providing information on its website regarding HAC handset models, Cricket sales personnel have been made aware of the HAC requirements and the HAC handsets offered by Cricket. Cricket makes HAC handsets available to customers for testing in its retail stores, as required by Section 20.19(c)(4)(i) of the FCC's rules.

### Methodology for Functionality Levels

Cricket offers handsets with a wide range of features and capabilities, and at varying price points. As demonstrated on Cricket's webpage describing its handset models, Cricket's HAC-rated handsets range from simple devices with basic functionality at lower price points, to high-end smartphones with advanced features and higher-speed data capabilities. Cricket classifies its handset models into three categories:

Good - Basic functionality; devices that utilize basic technology and contains basic and standard features commonly available on most handsets.

Better - Intermediate functionality; devices that tend to utilize newer technologies, data speeds and/or improvements in feature sets.

Best - Advanced functionality; devices that tend to introduce new technologies, new data speeds and/or leading edge feature sets.

### Report Remarks

This report covers only the period of time during 2014 prior to the acquisition of Leap Wireless by AT&T, from January 1, 2014 through March 13, 2014. Devices offered under the Cricket brand after March 13, 2014 are included in the AT&T HAC Report.

You have reported the following handset model summary information.

Total number of handsets offered: 20

Air Interface	Fully Hearing Aid Compatible		Acoustic Coupling Compatible Only		Non-Compliant Handsets		Total by Air Interface
	Number	Percent	Number	Percent	Number	Percent
